To the reader

This codebook is part of the data FSD1013 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Finnish Voter Barometers

The Finnish Voter Barometer surveys are commissioned by the major parties in the Parliament. In election years, other sponsors have also been involved. Up till 1988, the surveys were planned by Gallup Finland (TNS Gallup Ltd) and the Department of Political and Economic Studies at the University of Helsinki, in collaboration with the political parties. After 1988, the planning has been in the hands of Gallup Finland and the parties.

From 1973 to 1990, the annual voter barometers were collected mainly with face-to-face interviews using structured questionnaires, 1000-2000 interviews/barometer. Since 1991, the data have been collected with GallupChannel (PC's installed in respondents' homes). No surveys were conducted in 1985 and 1989.

Survey themes include voting behaviour, opinions on the government and the parties, and attitudes towards national political issues. In addition, respondents' economic expectations and political participation have often been studied, as well as their opinions on local politics, and the significance of the party leader to a party. Background variables have often included the social class of the respondent and the household head, economic activity of the household head, respondent's education, age, mother tongue, gender, party membership, political views, trade union membership, and family's annual income. There are also regional variables. Even though the variables are not always fully comparable from one survey to another, all kinds of comparisons over time are possible. The FSD collections cover data from 1973.

Abstract

The variables describe the following: household's economic situation, satisfaction in the government's action, opinions on the agreement reached through collective bargaining, interest in politics, political alienation, parties' principles and orientation towards the future, left/right dimension, definition and changing of one's party, voting in the 1984 municipal elections, and voting for the same party. Some variables are connected with the interview situation and the social structure of the sample.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland

Analysis or observation unit type: Individual

Universe: Finnish population aged 18 or over

Collection date: 7.4.1986 – 30.4.1986

Data collector(s): Gallup Finland

Data producer(s): Gallup Finland; University of Helsinki. Department of Political Science

Mode of data collection: Face-to-face interview

Type of research instrument: Structured questionnaire

Time period covered: 1986

Time method of the data collection: Longitudinal: Trend/Repeated cross-section

Number of variables and cases: The data contain 234 variables and 1202 cases.

Sampling procedure: Probability: Multistage

At first, the target population was stratified according to the number of inhabitants aged 18 or over in each province and in the second stage, by municipality group within each province. Municipalities were classified into five groups on the basis of their level of industrialisation. The stratifying frame achieved in this manner was used to count how many interviews should be done in the municipalities of each municipality group in order to have a geographically and demographically representative sample. The municipalities in the sample have been selected with the Deming zone selection method. This method is based on the use of random numbers and gives each municipality an equal chance to be selected, although municipalities with large population have a better chance to be selected. A municipality may be sampled more than once - in which case more than one starting point is drawn for that municipality. The interviews were conducted in clusters of four subjects using the starting point method. The starting points were drawn from the population register, selecting individuals born on the 5th of any month, and then selecting starting addresses among them from the sample municipalities at fixed intervals. The first interview was conducted at the starting point, after which the interviewer proceeded to the next three households. Within the household, the person whose birth date was closest to the beginning of any month was chosen for the interview. Interviews were conducted in 47 cities and 61 rural municipalities. The number of respondents was 1,202.

Joskus politiikka vaikuttaa niin monimutkaiselta, että minunlaiseni ihminen ei oikein ymmärrä, mitä on tekeillä	1	2	3	4	5	127
Puolueet ovat kiinnostuneita vain ihmisten antamista äänistä, eivätkä heidän mielipiteistään	1	2	3	4	5	128
On ainakin yksi puolue, joka aina yrittää ajaa minunlaiseni ihmisen etua	1	2	3	4	5	129
Äänestämällä voi todella olla mukana päättämässä, kuinka asioita maassa hoidetaan	1	2	3	4	5	130
Puolueiden kautta kansalaisten mielipiteet tulevat päätöksenteossa huomioonotetuksi	1	2	3	4	5	131
Ns. vaihtoehtoliikkeet edustavat kansalaisten mielipiteitä monissa asioissa varsinaisia puolueita paremmin	1	2	3	4	5	132
Puolueet eivät maassamme yleensä pidä kiinni poliittisesta linjastaan, vaan toimivat liiaksi hetkellisten näkökohtien mukaan	1	2	3	4	5	133
Kannattamani puolueen tulisi nykyistä selvemmin tuoda esiin periaatteellinen linjansa yhteiskunnallisissa kysymyksissä	1	2	3	4	5	134

7. Jos ajattelette sitä puoluetta, jota tällä hetkellä lähinnä kannatatte, niin mikä seuraavista vaihtoehdoista vastaa mielipidettänne puolueen toiminnasta? (KORTTI 7)

Puolue korostaisi aatteellisten näkökohtien merkitystä ja pidättäytyisi vaalilupauksista	1	2	3	4	5	139

10. Maassamme järjestetään eduskuntavaalit noin vuoden kuluttua ja tasavallan presidentin vaalit kahden vuoden kuluttua. Eri puolueiden presidenttiehdokkaista on keskusteltu julkisuudessakin; joissakin puolueissa ehdokkaan valinta näyttää selvältä, toisissa presidenttiehdokaskeskustelua ei ole paljoakaan käyty.

Miten tärkeitä Teille olisi se, että puolueet tekisivät päätöksen presidenttiehdokkaasta jo ennen vuoden päästä pidettäviä eduskuntavaaleja, jolloin eduskuntavaalien aikaan jo tiedettäisiin ketä eri puolueet tulevaisiksi presidentiksi kannattavat?

Mikä seuraavista vaihtoehtoista olisi Teille mieluisin?
(KORTTI; VAIHTOEHDOT LUETELLAAN)

- 1 puolue kannattaisi nykyisen presidentin uudelleenvalintaan
 - 2 puolue päättäisi asettaa ehdokkaakseen oman puolueensa ehdokkaan
 - 3 puolue asettuisi tukemaan useiden puolueiden yhteistä ehdokasta nykyisen presidentin tilalle

12. Viime vaaleissa nousi eduskuntaan ns. vihreä vaaliliitto. Tulevissa vuoden 1987 eduskuntavaaleissa on edellisiin eduskuntavaaleihin verrattuna jälleen kolme uutta erillistä vaaliliittoa: Liberaalinen Kansanpuolue, Suomen Eläkeläisten Puolue sekä Suomen Kommunistisen puolueen piiristä Tiedonantaja-lehden vaikutuspiiriin syntynyt niin sanottu yhtenäisyysrintama.

Millainen käsitys teillä on tällaisten uusien ryhmien tulosta politiikkaan; onko niistä maan asioiden hoitamisen kannalta mielestänne etua vai haittaa? (KORTTI 12)
