To the reader

This codebook is part of the data FSD1035 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Gallup Finland: Finnish Voter Barometer October 1997 [dataset]. Version 3.0 (2018-07-18). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD1035>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Series description

The data belong to the series:

Finnish Voter Barometers

The Finnish Voter Barometer surveys are commissioned by the major parties in the Parliament. In election years, other sponsors have also been involved. Up till 1988, the surveys were planned by Gallup Finland (TNS Gallup Ltd) and the Department of Political and Economic Studies at the University of Helsinki, in collaboration with the political parties. After 1988, the planning has been in the hands of Gallup Finland and the parties.

From 1973 to 1990, the annual voter barometers were collected mainly with face-to-face interviews using structured questionnaires, 1000-2000 interviews/barometer. Since 1991, the data have been collected with GallupChannel (PC's installed in respondents' homes). No surveys were conducted in 1985 and 1989.

Survey themes include voting behaviour, opinions on the government and the parties, and attitudes towards national political issues. In addition, respondents' economic expectations and political participation have often been studied, as well as their opinions on local politics, and the significance of the party leader to a party. Background variables have often included the social class of the respondent and the household head, economic activity of the household head, respondent's education, age, mother tongue, gender, party membership, political views, trade union membership, and family's annual income. There are also regional variables. Even though the variables are not always fully comparable from one survey to another, all kinds of comparisons over time are possible. The FSD collections cover data from 1973.

Abstract

The survey studied the attitudes of the Finns towards different political parties. The respondents were asked how favourably or negatively they view the Centre Party of Finland, the Finnish

Social Democratic Party, the National Coalition Party, the Left Alliance, and the Green League. A number of attributes and characteristics were listed, and the respondents were asked to which party they could be applied. The respondents assessed government performance and were asked to name the party they would like to win the parliamentary elections. Voting behaviour was studied by asking the respondents for what party or group they would vote if the elections were held now, and how did they vote in the 1995 parliamentary elections and in the 1996 municipal elections, and which factors had affected their party selection. In addition, the respondents were asked whether they took care of everyday shopping or cooking in the household.

Background variables included the respondent's year of birth, marital status, annual gross income, place of residence, occupational group, line of work, trade union membership, and mother tongue.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland

Analysis or observation unit type: Individual

Universe: Population of Finland aged 15-70 years, excluding the Åland Islands

Collection date: 3.10.1997 – 7.10.1997

Data collector(s): Gallup Finland

Data producer(s): Gallup Finland

Mode of data collection: Self-administered questionnaire: Web-based (CAWI)

Type of research instrument: Structured questionnaire

Time period covered: 1997

Time method of the data collection: Longitudinal: Trend/Repeated cross-section

Number of variables and cases: The data contain 196 variables and 1276 cases.

Sampling procedure: Probability: Multistage

The information has been gathered through GallupChannel with personal computers and Internet terminals installed in people's homes. The sample has been carried out as a multistage stratified sample resulting in a fixed sample.

1.4 Use of data

Data appraisal

The variables identifying postal code and municipality have been removed from the data set.
