# To the reader

This codebook is part of the data FSD1127 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Church Research Institute: Prayer Study 1998 [dataset]. Version 1.0 (2002-01-24). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD1127>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

## **Abstract**

The Prayer Study surveyed prayer habits and beliefs associated with praying in Finland. The respondents were asked how often they prayed for health, life-companion, world peace, God's grace, among others. In addition, the frequency of praying for different people and things (e.g. relatives, the unemployed, nature, decision-makers, other churches) was studied. Types of prayer used were charted. The survey also carried a number of statements relating to prayers and praying.

Background variables included the respondent's year of birth, marital status, gross annual income, place of residence, occupational group, line of business, trade union membership, mother tongue, number of children, party identification, and social class.

## **1.3 Structure and collection of the data**

**Country:** Finland

**Geographic coverage:** Finland

**Analysis or observation unit type:** Individual

**Universe:** People aged 15 - 70 living in Finland, excluding the Åland Islands

**Collection date:** 27.3.1998 – 31.3.1998

**Data collector(s):** Gallup Finland

**Data producer(s):** Church Research Institute

**Mode of data collection:** Face-to-face interview: Computer-assisted (CAPI/CAMI)

**Type of research instrument:** Structured questionnaire

**Time period covered:** 1998

**Time method of the data collection:** Cross-section

**Number of variables and cases:** The data contain 104 variables and 1218 cases.

**Sampling procedure:** Probability: Multistage

The data were collected via GallupChannel, that is by using Internet terminals installed in the respondents' homes. The sample was collected as a multistage stratified sample resulting in a fixed sample.

## 1.4 Use of data

### Data appraisal

The variables identifying municipality and postal code have been removed from the data.
