To the reader

This codebook is part of the data FSD1201 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Outinen, Seppo (The Association of Finnish Cities) & Varhe, Seppo (The Association of Finnish Cities): City Service Survey 1985 [dataset]. Version 2.0 (2018-09-10). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD1201>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Series description

The data belong to the series:

City Service Surveys

City services have been studied since 1983. The surveys, conducted by the Association of Finnish Cities, and since 1993 by Efektia and Efeko (nowadays FCG Finnish Consulting Group), canvass citizens' attitudes towards municipal services and administration. The datasets are to a large extent comparable.

Abstract

City service survey 1985 charted citizen's views on the current state and development needs of city services and administration. Respondents answered questions about their dwelling area and housing, childcare arrangements, child health clinics, primary schools, secondary schools, health services, care of the elderly, cultural activities, leisure and recreation opportunities, city administration, means of communication used to inform citizens about the services offered and possibilities to exercise influence on decision-making.

Some topics examined municipality finances. Respondents were asked, for example, which public services could be privatized or discontinued. They were also asked about their everyday life, moving intentions and priority areas for city development. Background variables included date of birth, sex, marital status, number of children, occupational status, means of transportation to work and distance between home and work.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland, Forssa, Hanko, Hyvinkää, Kajaani, Kokemäki, Kotka, Kouvolaa, Kuopio, Kurikka, Nurmes, Oulu, Pietarsaari, Raisio, Rovaniemi, Varkaus, Joutseno

Analysis or observation unit type: Individual

Universe: Finns aged 18 to 70 living in any of the participating towns/cities

Collection date: 1985

Data collector(s): The Association of Finnish Cities

Data producer(s): The Association of Finnish Cities

Mode of data collection: Self-administered questionnaire: Paper

Type of research instrument: Structured questionnaire

Time period covered: 1985

Time method of the data collection: Longitudinal: Trend/Repeated cross-section

Response rate: 73.6%

Number of variables and cases: The data contain 182 variables and 9347 cases.

Sampling procedure: Probability: Simple random

Sample size varied according to city/town size. The sample of 15 cities/towns and one rural municipality was selected by judgement sampling. Respondents were randomly selected from the 18-70-year-old citizens of the sample municipalities.

1.4 Use of data

Data appraisal

Question 49 in the questionnaire is missing from the data, as well as responses to open-ended questions 57, 58, 59 and 60. To prevent identification, a variable indicating postal code was removed from the data during archiving, and responses to variables q1 and q5 (birth year, number of children) were categorised.

KAUPUNGIN KEHITTÄMINEN

53 **Mitkä kaksi** seuraavista asioista katsotte tärkeimmiksi kun kaupunkianne rakennetaan tulevaisuudessa

- 1 Väljien omakotialueiden lisääminen
- 2 Asuntojen lisääminen keskustaan tai sen yhteyteen
- 3 Koulujen, päiväkotien, kirjastojen, terveyskeskusten rakentaminen lähemmäs asukkaita
- 4 Kauppojen, ravintoloiden yms. sijoittaminen lähemmäs asukkaita
- 5 Puistojen ja ulkoilualueiden lisääminen
- 6 Kaupunkiympäristön viihtyisyyden parantaminen
- 7 Vanhojen rakennusten säilyttäminen ja suojelu

54 Jos kaupungin tuottamia palveluja lisätään, merkitsee se kaupungin taloudessa lisää menoja. Oletteko valmis rahoittamaan lisäpalvelut

- 1 veroäyriin hintaa korottamalla
- 2 maksuja (vesi-, sähkö-, lämpö-, katu- ym. maksut) korottamalla
- 3 osittain molemmilla tavoilla

- 55 Jos kaupungin palveluista jouduttaisiin tinkimään, mistä te tinkisitte ensimmäiseksi?

Ympyröikää kaksi tärkeintä tinkimiskohdetta.

- 1 terveyspalvelut
- 2 lasten päivähoito
- 3 vanhusten huolto
- 4 koulutoimi
- 5 kulttuuri (kirjastot, teatteri, museot, musiikkitoiminta)
- 6 urheilu ja ulkoilu
- 7 nuorisotoiminta
- 8 puistojen hoito
- 9 katujen ja teiden hoito
- 10 kaupungin liikelaitokset (sähkö-, vesi-, lämpö- yms.)
- 11 jokin muu, mikä _____

- 56 Tässä kyselyssä on käsitelty muutamia kaupungin palvelutehtäviä. Katsoisitteko, että alla luetelluissa tehtäväalueissa on joitakin sellaisia tehtäviä, jotka voisi hoitaa yksityinen yritys tai asuinyhteisö omatoimisesti

	voitaisiin siirtää yksityisille	voitaisiin hoitaa omatoimisesti asuin- yhteisöissä	kaupungin palvelut tulee säilyttää ennallaan
Lastenhoito.....	1	2	3
Terveystenhoito.....	1	2	3
Koulutoimi.....	1	2	3
Vanhustenhuolto.....	1	2	3
Kulttuuripalvelut	1	2	3
Ulkoilu- ja vapaa-aikapalvelut	1	2	3

- 57 Onko mielestänne joitakin muita kaupungin nyt hoitamia tehtäviä, jotka yksityinen yritys tai asuinyhteisö voisi hoitaa?

- 58 Onko kaupungilla sellaisia tehtäviä, jotka mielestänne ovat turhia ja joista voitaisiin kokonaan luopua?

- 59 Entä pitäisikö kaupungin ottaa hoitaakseen joitakin sellaisia **uusia tehtäviä**, jotka nyt eivät kuulu kaupungin tehtäviin?

- 60 Mitä muuta haluaisitte sanoa kaupunkinne kehittämisestä?
