To the reader

This codebook is part of the data FSD2022 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Kouvo, Antti (University of Turku): Environmental Attitudes and Behaviour of South-Western Finns 1999 [dataset]. Version 2.0 (2018-07-16). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD2022>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Abstract

The survey is part of local Agenda 21 programme for southwestern Finland. The programme is a global plan of action for sustainable development. The study charted environmental behaviour of southwestern Finns and different forms of, preconditions for and obstacles to environmentally friendly action.

The respondents' actions and habits that affected the environment were studied with questions about traffic, consumption, nutrition, energy, garbage disposal and hobbies in nature. The respondents were asked distances to their workplace or school and shops as well as their mode of travel. They were also requested to identify various eco-labels. The respondents described their household's waste paper, glass and bio waste recycling practices and evaluated how environmentally friendly their consumer behaviour was.

The survey examined the respondents' concern regarding social problems relating to, for example, mass unemployment, inequality and the global economy. It also charted how concerned the respondents were about environmental problems at the global and local levels. The global problems included ozone depletion, genetic engineering and population growth, while the local ones included over-enrichment (eutrophication) of the Baltic Sea and lakes, demolition of old buildings and degradation of drinking water quality. The survey also covered the respondents' opinions on the difficulty of recycling, responsibility issues relating to the environmental impacts of products, environmental legislation, private motoring, industrial emissions, the relationship between economic growth and the environment, and the importance of consumption choices made by regular people.

The respondents were asked which party they would have voted for if the parliamentary elections had been held the following day. They were also asked to state whether they had supported some environmental group or organisation in the past five years. Background variables included

the respondent's gender, year of birth, basic and vocational education, municipality, type of region and accommodation, household size, number of household members aged under 15, and household's monthly income.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: All southwestern municipalities

Analysis or observation unit type: Individual

Universe: People aged between 17 and 74 living in southwestern Finland

Collection date: 1.5.1999 – 16.7.1999

Data collector(s): Kouvo, Antti (University of Turku. Department of Sociology)

Data producer(s): University of Turku. Department of Sociology; The Agenda Office of South-west Finland

Mode of data collection: Self-administered questionnaire: Paper

Type of research instrument: Structured questionnaire

Time period covered: 1999

Time method of the data collection: Cross-section

Response rate: 66.9%

Number of variables and cases: The data contain 145 variables and 1004 cases.

Sampling procedure: Probability: Stratified

The survey was carried out in two waves. During the first wave in the autumn of 1998, 30 theme interviews were conducted. Respondents were selected on the basis of their gender, occupation, age, region of residence and education. The interviews took from half an hour to an hour. The questionnaire was based on the interviews and they were also further analysed. In the second wave, a questionnaire was sent to 1,501 people in southwestern Finland. Respondents were randomly selected in five parts. The registry office could not perform the sample selection for all the municipalities at once but in groups of ten municipalities at a time. 1,016 questionnaires were returned and 1,004 of them were usable. Non-respondents were sent a reminder letter. Women were more active in responding than men.

1.4 Use of data

Data appraisal

The variable identifying municipality has been removed from the data.

Arvoisa vastaanottaja

Teemme tutkimusta ympäristöystävällisestä arjesta. Juuri Teidät on valittu satunnaisuuteen perustuvalla poimintatavalla vastaamaan tähän Varsinais-Suomen alueella suoritettavaan lomakekyselyyn.

Tutkimus suoritetaan Turun yliopiston sosiologian laitoksen ja Varsinais-Suomen Agendatoimiston (Ympäristövirasto) yhteistyönä. Siitä saatavia tuloksia tullaan käyttämään ympäristöystävällisen käyttäytymisen edellytysten parantamiseen, joten vastaamalla kysymyksiin avoimesti ja rehellisesti olette mukana vaikuttamassa omaan elinympäristöönne. **Lisäksi kyselyyn osallistuneiden kesken arvotaan kymmenen kappaletta Raisio-yhtymän monipuolisia tuotepaketteja.**

Tutkimuksen tulokset syötetään kysymyslomakkeilta tietokoneelle ja vasta tämän koodatun aineiston pohjalta suoritetaan tilastollinen analyysi ja raportointi. **Vastaajan henkilöllisyys ei paljastu, eikä sitä voida yhdistää annettuihin vastauksiin.**

Kysymyslomakkeen täyttäminen kestää n. 10-20 minuuttia. Lukekaa jokainen kysymys ja mahdolliset vastausvaihtoehdot kertaalleen läpi ennen kuin vastaatte kysymyksiin. Älkää kuitenkaan jääkö miettimään liikoja - ensimmäinen mielipide on yleensä se paras. Suurimmassa osassa kysymyksiä vastaaminen tapahtuu piirtämällä rasti vastausvaihtoehdon kohdalla olevaan neliöön. **Huom: Kysely on painettu paperin molemmille puolille.**

Täytettyänne kyselyn postittakaa se mahdollisimman pian (mielellään noin viikon kuluessa saapumisesta) oheista vastauskuorta käyttäen. Vastauskuoren postimaksu on maksettu.

Ystävällisin tutkimusterveisin

Seuraavassa on joukko mahdollisia maattamme uhkaavia yhteiskunnallisia ongelmia. Kuinka huolissanne olette niistä? Asettakaa kaikki ongelmat keskenään numerojärjestykseen niiden vakavuuden mukaan (1. = vakavin, 2. = toiseksi vakavin, jne... 10. = kymmenenneksi vakavin). Kirjoittakaa numero ongelman edessä olevaan ruutuun.

	Joukkotyöttömyys
	Kasvava eriarvoisuus vähäosaisten ja rikkaiden välillä
	Ydinaseiden joutuminen väärin käsiin ja siitä seuraava ydinsodan uhka
	Ympäristöongelmat
	Euroopan Unioni
	Venäjän epävakaa poliittinen tilanne
	Seuraava taloudellinen lama
	Maailmanlaajuinen talous ja siihen liittyvät uhkatekijät

Kysymys 51.

Seuraavassa kysymyksessä on esitetty joukko väittämiä. Rastittakaa kunkin kysymyksen kohdalla itsellenne sopivimpana pitämänne vaihtoehto.

	Täysin samaa mieltä	Jokseenkin samaa mieltä	Jokseenkin eri mieltä	Täysin eri mieltä	En osaa sanoa
Kierrättääkseni joudun näkemään kohtuuttomasti vaivaa	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Ympäristöystävällisten kulutustuotteiden tulisi olla edullisempia ja ympäristölle haitallisten kalliimpia, jotta käyttäytyisin ympäristöystävällisemmin	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Olen vakavasti aikonut muuttaa elämäntapaani nykyistä ympäristöystävällisemmäksi <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Vastuu tuotteiden ympäristövaikutuksista on ennen kaikkea sen valmistajalla, ei kuluttajalla	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Käyttäytyäkseen ympäristöystävällisesti, joutuu muuttamaan liikaa jokapäiväisiä tottumuksiaan	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Jatkuva talouskasvu ja ympäristönsuojelu ovat mahdollisia samanaikaisesti	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Ympäristöystävällisesti käyttäytyvät ihmiset leimautuvat helposti oudoiksi	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Bensiinin hinnan täytyisi olla huomattavasti korkeampi, jotta ihmiset vähentäisivät henkilöauton käyttöä	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Kierrätys ja kompostointi ovat liian likaista puuhaa	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Yksityisten ihmisten ei pitäisi olla vastuussa ympäristönsuojelusta, vaan julkisen vallan tulisi huolehtia siitä	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Lainsäädännöllä tulisi vaikuttaa enemmän ympäristöystävälliseen käyttäytymiseen	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
On vaikea havaita, mitä omalla ympäristöystävällisellä käyttäytymisellä saa aikaan	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Kasvihuoneilmiön syynä on otsonikerroksessa oleva aukko	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	Täysin samaa mieltä	Jokseenkin samaa mieltä	Jokseenkin eri mieltä	Täysin eri mieltä	En osaa sanoa
Tiedotusvälineissä paisutellaan liikaa ympäristöasioita	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Ympäristöystävällisestäkäyttäytymisestä tulisi olla enemmän taloudellista hyötyä	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Teollisuus on niin suuri ympäristö-ongelmien aiheuttaja, ettei kansalaisten käyttäytymisellä ole juurikaan merkitystä	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Yksityisauton käyttö on välttämätöntä, koska julkinen liikenne ei ole riittävää	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Käyttäytyäkseen ympäristöystävällisesti joutuu tinkimään liikaa elintasostaan	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Kierrättäisin enemmän, jos kierrätys olisi paikkakunnallani paremmin järjestetty	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Ulkomaisen teollisuuden päästöt ovat suuria eivätkä suomalaiset pysty vaikuttamaan niiden määrään	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Ympäristönsuojelu on jo nykyisellään Suomessa riittävän hyvällä mallilla	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
On hyvin epäselvää, mitä kaikkea tavallisen kansalaisen pitäisi tehdä käyttäytyäkseen ympäristöystävällisesti	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Olen valmis hyväksymään elintason laskun luonnon suojelemiseksi	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Eri tuotteiden ympäristöystävällisyyttä on liian vaikea verrata keskenään	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
On järjetöntä käyttäytyä ympäristöystävällisesti, jos kaikki muutkaan eivät käyttäydy niin	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Taloukasvu tulisi asettaa etusijalle siinäkin tapauksessa, että ympäristö jonkin verran kärsii	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
En ole aivan varma siitä, mitkä seikat tekevät elintarvikkeesta ympäristöystävällisen	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Asuinyhteisössäni (esim. asunto-osakeyhtiö, asukasyhdistys, kylätoimikunta.) on kiinnitetty huomiota ympäristöasioihin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	Täysin samaa mieltä	Jokseenkin samaa mieltä	Jokseenkin eri mieltä	Täysin eri mieltä	En osaa sanoa
Yksityisen kansalaisen ei ole syytä käyttäytyä erityisen ympäristöystävällisesti, koska tiede ja tekniikka ratkaisevat tulevaisuudessa ympäristöongelmat	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Tieto siitä, miten tavallinen kuluttaja voisi käyttäytyä ympäristöystävällisesti ei ole aina luotettavaa	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Tavallinen kuluttaja ei voi tehdä paljoakaan ympäristön hyväksi	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Teollisuus toimii jo tällä hetkellä riittävän ympäristöystävällisesti	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Tavalliset ihmiset ovat kulutusvalinnoillaan vastuussa ympäristön tilasta	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Yksityisautoilu ei ole kovinkaan merkittävä ilman saastumisen syy	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Keskustelen usein ympäristöasioista tuttavieni kanssa	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Kysymys 52.

Oletteko viimeisen viiden vuoden aikana tukenut jotain ympäristön suojelua tai -parantamista ajavaa ryhmää, järjestöä tai yhdistystä olemalla jäsen, antamalla rahaa tai osallistumalla muuten toimintaan ?
