To the reader

This codebook is part of the data FSD2032 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Church Research Institute: Church Monitor 2002 [dataset]. Version 3.0 (2018-07-17). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD2032>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Study description

1.1 Titles

Titles and data version: Church Monitor 2002

Titles and data version in Finnish: Kirkkomonitor 2002

This codebook has been generated from the version 3.0 (17.7.2018) of the data.

1.2 Subject description

Authoring entity

Church Research Institute

Copyright statement for the data

According to the agreement between FSD and the depositor.

Depositor

Church Research Institute

Date of deposit

13.12.2004

Keywords

moral concepts; moral values; religious affiliation; religious attendance; religious beliefs; supernatural; virtues and vices

Topic Classification

Fields of Science Classification: social sciences; tieteen humanities

CESSDA Classification: religion and values

Series description

The data belong to the series:

Church Monitors

The survey series, produced by the Church Research Institute, studies the religiosity and beliefs of continental Finns, and their relationship to the Evangelical Lutheran Church of Finland and other religious communities. Themes studied include supernatural phenomena, spirituality and morality, and the importance of different parish activities. The survey data have been collected as part of a separate, cross-national RISC Monitor study. The surveys are carried out by MDC RISC International and Gallup Finland (Kantar TNS). The FSD collections cover data from 1999 onwards.

Abstract

The survey focused on Finnish perceptions of sin and supernatural phenomena. First, the respondents were asked whether they belonged to a church or other religious denomination, whether they believed in God, and how often they attended church services. Moral concepts and moral values were studied by asking the respondents whether certain actions were morally wrong or not: use of alcohol, smoking, use of illegal drugs, lying, envying others, stealing, killing, tax fraud, extramarital sex, homosexual sex, use of contraceptives, abortion, divorce, etc. The respondents were asked to what extent they agreed with a number of statements relating to UFOs, alternative medicine, astrology, reincarnation, fortune-telling, spiritual growth, and meditation.

Background variables included the respondent's gender, age group, education, type of neighbourhood, and province of residence.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland

Analysis or observation unit type: Individual

Universe: People aged 15-75 living in Finland, excluding the Åland Islands

Collection date: 2002

Data collector(s): Gallup Finland

Data producer(s): Church Research Institute

Mode of data collection: Face-to-face interview

Type of research instrument: Structured questionnaire

Time period covered: 2002

Time method of the data collection: Longitudinal: Trend/Repeated cross-section

Number of variables and cases: The data contain 42 variables and 2520 cases.

Sampling procedure: Non-probability: Quota

Starting point method. The data were collected as part of the RISC Monitor survey in 2002. The sample size was approximately 2,500.

1.4 Use of data

Data appraisal

Exact dates of the data collection are now known.
