To the reader

This codebook is part of the data FSD2041 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Autio, Minna (University of Helsinki) & Wilska, Terhi-Anna (Turku School of Economics and Business Administration): Youth Consumer Cultures in Information Society 2001 [dataset]. Version 1.0 (2005-05-30). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD2041>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Abstract

The study is part of the Sustainable Development and the Information Society -programme (KESTY) of the Finnish Ministry of the Environment. It charted the opinions of young people (aged between 16 and 20) on consumption, information society, communications technology and the environmental impacts of consumption. Respondents were also asked about their income and use of money. For example, they were asked how much money they earn themselves, how much they can save and spend on leisure activities. Parents' financial support and influence on their children's consumer decisions were probed on.

One theme covered mobile phones and information society. Respondents were asked to state how many mobile phones they have had so far and how actively they use their phone and its extra services (e.g. logos, ring tones and call transfers). Views on information technology and the development of information society were charted with a set of attitudinal statements.

Perceptions of the relationship between environment and consumption were investigated. Respondents were asked whether they buy organic, fair trade, eco-label and second-hand products and whether environmental aspects play an important role in their consumer choices and habits. General environmental attitudes were studied with different statements. Household's standard of equipment (e.g. car, digital camera, television, mobile phone) and the use of different chargeable services (movies, trips abroad, concerts, etc.) were examined.

Background variables included respondent's gender, age, location of residence, household composition, total number of siblings and number of siblings living at home, number of household members and father and mother's level of education and occupation.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland

Analysis or observation unit type: Individual

Universe: Young people aged about 16-20 studying at Finnish upper secondary schools

Collection date: 1.4.2001 – 31.5.2001

Data collector(s): Autio, Minna (University of Helsinki. Department of Economics and Management); Wilska, Terhi-Anna (Turku School of Economics and Business Administration. Department of Marketing)

Data producer(s): Ministry of the Environment

Mode of data collection: Self-administered questionnaire: Paper

Type of research instrument: Structured questionnaire

Time period covered: 2001

Time method of the data collection: Cross-section

Number of variables and cases: The data contain 314 variables and 637 cases.

Sampling procedure: Non-probability: Purposive

1.4 Use of data

Data appraisal

The data do not include open-ended answers. The variable identifying individual schools has been replaced by a school type variable. The dataset is missing an accompanying question in variable Q55 that charted the respondent's own service use.

56. Tee ajatusleikki ja hyppää tulevaisuuteen: olet "vakiintunut" 40-vuotias. Millaisia mahdollisia elämäntapojasi sinulla voisi olla? Laita rasti oikeaan vaihtoehtoon.

	Todennäköistä	Mahdollista	Epätodennäköistä
a) Minulla on hyväpalkkainen työ. Olen menestynyt taloudellisesti.			
b) "Peruspaketti" on kasassa: aviopuoliso, perhe ja tasainen elämäntapa.			
c) Minulla on kesämökki ja/tai purje-/moottorivene.			
d) Elintasoni ei ole kovin korkea. Tärkeintä on kuitenkin katto pään päällä, perhe ja ystävät.			
f) Asun omistusasunnossa ja ajan omalla autolla.			
e) Toteutan vihreitä arvoja kuluttamalla maltillisesti.			
g) Omistaminen ei ole minulle tärkeää. Asun vuokralla, käytän julkista liikennettä ja taksia tarvittaessa.			
h) Muutin/jäin maalle ja hankin paremman elämäntilan. Teen etätöitä.			
i) Minulla jäi bailausvaihe päälle... Olen nauttinut rennosti elämästä. Vakituinen työ- ja asuinpaikka ei ole ollut minun juttuni.			

Kiitos vastauksista ja hyvää kesää!
