# To the reader

This codebook is part of the data FSD2355 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Grönlund, Kimmo (Åbo Akademi University) & Herne, Kaisa (University of Turku) & Setälä, Maija (University of Turku): Deliberative Discussion on Nuclear Power 2006 [dataset]. Version 2.0 (2018-07-23). Finnish Social Science Data Archive [distributor]. <http://urn.fi/urn:nbn:fi:fsd:T-FSD2355>

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

### **Abstract**

The data contain the responses of five surveys conducted in connection with the deliberative experiment called Citizen Deliberation organised by the Interdisciplinary Centre of Excellence "Democracy: a Citizen Perspective", at the Åbo Akademi University. The Citizen Deliberation was an experiment on democratic deliberation, which culminated in the actual deliberation day organised in Turku on the 18th of November 2006. The topic of the discussion was: "Should a sixth nuclear power plant be built in Finland?" Before the actual deliberation day, the participants received balanced information on nuclear energy, and they were also given an opportunity to hear experts' views on the topic. The discussion was conducted under guidance in small groups.

The surveys were conducted in three waves: in September 2006, on the 18th of November 2006, and in February 2007. In September, 2,500 randomly sampled people from Turku region were sent a survey and an invitation to the Citizen Deliberation event. The survey contained questions on nuclear power, energy, social participation, and political activity. In addition, socio-economic background variables were included in the September questionnaire.

The November wave contained three surveys, which were conducted at the beginning, during, and at the end of the deliberative discussion. In the first survey, the respondents participating in the discussion were asked about their views on energy issues and general knowledge on political issues. The respondents replied to the second survey after familiarising themselves with the balanced information on nuclear energy and hearing the experts, but before the group discussions. The third survey was presented to the respondents at the end of the event, and it contained the same questions that were posed at the beginning of the discussion and in September. In addition, the respondents' experiences on the Citizen Deliberation were charted. The number of respondents in the November surveys was 135.

In February, the participants of the Citizen Deliberation and the respondents volunteered in the September survey were sent a follow-up questionnaire, which included mostly the same questions as the first data collection round, but there were also additional questions for those who had participated in the Citizen Deliberation event.

Background variables included the respondent's gender, age, mother tongue, municipality of residence, year of birth, marital status, education, occupational group, economic activity, household size, and gross income.

## 1.4 Use of data

### Data appraisal

The data were collected in five separate collection rounds and with five different questionnaires. During the archiving, letters a, b, c, d and e have been used to separate questions of different questionnaires. Questions q1a-q76a (questionnaire 1) were collected in September 2006. Questions q1b-q15b (questionnaire 2) were collected in November 2006 at the beginning of the Citizen Deliberation event, questions q1c-q7c (questionnaire 3) during the event, and questions q1d-q90d (questionnaire 4) after it. Questions q1e-q74e (questionnaire 5) were collected in February 2007.

	<i>Helt av samma åsikt</i>	<i>Delvis av samma åsikt</i>	<i>Delvis av annan åsikt</i>	<i>Helt av annan åsikt</i>	Vet ej
41 Genom att rösta kan man påverka saker och ting.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
42 De beslut som politikerna fattar påverkar inte mitt liv.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
43 Vårt land behöver starka ledare som kan återställa disciplin och ordning i samhället.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

47 Jag vet mer om politik och förvaltning än de flesta av mina medmänniskor.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
48 I en allt mer globaliserad värld har Finlands regering svårt att påverka det som händer i Finland.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
49 I slutändan är det ingen större skillnad vilka partier som ingår i Finlands regering.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
50 Folkomröstningar borde användas mer i finländskt beslutsfattande.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
51 Demokrati kan ha sina problem, men den är bättre än andra styrelseskick.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
52 Jag är nöjd med hur Finlands nuvarande regering sköter sitt jobb.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
