To the reader

This codebook is part of the data FSD2729 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

Advisory Council for Youth Affairs (Nuora) & Finnish Youth Research Society:

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Finnish Youth Surveys

Advisory Council for Youth Affairs (Nuora), nowadays called the State Youth Council, started to produce Youth Surveys in 1994. This survey series charts attitudes and expectations of Finnish young people aged 15 - 29. Each survey contains both current questions and recurring questions which are repeated over time, enabling the study of long-term attitude changes. The main themes include attitudes to education, working life, social security, spending, drug use, and young people's willingness to participate in order to influence decision-making.

Abstract

The theme of Finnish Youth Survey 2012 was relationships between generations and also included a sample of respondents' parents (or guardians).

First, views were probed on the respondents' trust in various institutions, interest in politics, own and parents' placement on the left-right scale and knowledge about parents' political party choices. Second set of questions surveyed how firmly the respondents felt they belonged to family, group of friends and other communities. The respondents were also asked to what extent they agreed with several statements relating to trust in other people.

Experience of volunteer work, reasons for volunteering or not volunteering and willingness to volunteer if asked were charted. Family relations were investigated with questions focusing on how often the respondents met family members and friends, which adjectives described their childhood home best, how often certain activities had been done in the family when they were school-aged and to what extent various statements applied to their parents (e.g. parents had helped with homework). One set of questions examined the respondents' estimates on how similar their opinions were to those of their parents.

The respondents' views on health were studied by asking whether they attempted to influence their well-being by doing certain things, how often they had exercise through all-day activities (such as commuting by bicycle), how many times a week they had physical exercise lasting more than 30 minutes, whether they did competitive sport, what the role of vegetables was in their diet and the reasons for eating vegetables.

Attitudes toward alcohol and substance use as well as smoking were investigated. Questions were asked about alcohol use in childhood home, opinions on alcohol-, drug- and smoking-related statements and the respondents' smoking habits and use of alcohol, snus and drugs.

Satisfaction in several things on a scale of 4-10 was charted. These included financial situation, leisure time, relationships, health, physical condition, appearance and life in general. Finally, the respondents were asked to rate their parents on the same scale in terms of teaching them healthy ways of life.

The respondents were also asked for consent to interview their parents. The parents were asked mostly the same questions as their children but the total number of questions was lower.

Background variables included, for the young respondents, their gender, age, mother tongue, household composition, number and ages of siblings, own and parents' level of education, average grade of the latest report card and economic activity and occupational status.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland

Analysis or observation unit type: Individual

Universe: Young people aged 15-29 living in Finland and their parents, excluding the Åland Islands

Collection date: 21.1.2012 – 18.2.2012

Data collector(s): IROResearch

Mode of data collection: Telephone interview

Type of research instrument: Structured questionnaire

Time period covered: 2012

Time method of the data collection: Longitudinal: Trend/Repeated cross-section

Number of variables and cases: The data contain 571 variables and 1902 cases.

Sampling procedure: Probability: Stratified

Sampling with strata based on age, gender and place of residence. The interviews of the young people were conducted between 21 Jan and 18 Feb 2012. In total, 1,902 Finnish-speaking young people were interviewed as well as 105 Swedish-speakers and 5 people with some other language as their mother tongue. The interviews were conducted in Finnish and Swedish. 17,994 people were contacted and 29,753 calls made. 4,961 refused to participate and 46 interviews were cancelled. 1,401 respondents left their contact information for a later study.

The parents were interviewed between 31 Jan and 18 Feb. 597 parents in total were interviewed. 1,338 parents were contacted with 1,988 calls made. 91 people refused to participate and one interview was cancelled. The interviews were conducted according to ISO 20252:2009 standard.

1.4 Use of data

Data appraisal

During the archiving process, the variable T3, which included postal codes, has been removed. At the end of the survey, the respondents were asked for their contact details and date of birth if they wanted to participate in a later study. These have been recorded in FSD and access to them can be granted for scientific purposes and upon presenting a research plan. The research plan must comply with the requirements of the Finnish Personal Data Act.

The responses of parents have been coded with y and z, with y denoting the responses of one and z denoting the responses of the other (e.g. k1y and k1z).

Ohjeistusehdotus:

Pyrimme haastattelemaan samaa tutkimusta varten myös nuorten vanhempia. Tällöin tutkija yhdistää sinulta saadut kyselyn tiedot vanhemmiltasi tai huoltajiltasi haastattelussa saatuihin tietoihin. Vastauksiasi ei siis kerrota vanhemillesi tai huoltajillesi, vaan kerättyä aineistoa käsitellään luottamuksellisesti ja analysoidaan tilastollisesti. Tutkimuksen tulokset julkaistaan tavalla, jossa yksittäisiä tutkittavia ei voi tunnistaa.

Mikäli voimme haastatella sinun vanhempiasi tai huoltajiasi, voisitko nimetä kaksi lapsuudessasi merkityksellistä vanhempaa tai muuta huoltajaa, joita voisimme haastatella? (OHJE: isä ja äiti, ottovanhemmat, uusperheen vanhemmat tai muut, jotka ovat osallistuneet kasvatukseen peruskouluiässä. Yksikin nimi riittää, mutta mieluummin kaksi.)

Saisinko tähän lopuksi heidän yhteystietonsa, kiitos.

(nimi ja puhelinnumero) (ohje: jos ei muista puhelinnumeroa, uusi soitto myöhemmin)

1. Saatiin isän nimi ja numero: _____
2. Saatiin äidin nimi ja numero: _____
3. Saatiin muun miespuolisen huoltajan nimi ja numero: _____
4. Saatiin muun naispuolisen huoltajan nimi ja numero: _____
5. Ei halua antaa yhteystietoja

Jos ei osaa sanoa puhelinnumeroa, kysytään isän/äidin/huoltajan nimen lisäksi osoitetiedot: (Haastattelijan OHJE: Jos ei osaa sanoa tarkkaa osoitetta, kadun nimi, postinumero ja postitoimipaikkakin riittävät).

Myöhemmin tehtävää jatkotutkimusta varten tarvitsemme yhteystietosi ja syntymäaikasi, jonka perusteella voimme löytää uudet yhteystietosi, mikäli olet vaihtanut asuinpaikkaa. Yhteystiedot säilytetään tietoturvallisesti erillään analysoitavasta aineistosta ja ne hävitetään jatkotutkimuksen päätyttyä. Tilastollinen aineisto arkistoidaan aihetta koskevan tutkimuksen ja opetuksen käyttöön Yhteiskuntatieteelliseen tietoarkistoon.

Jatkotutkimukseen osallistuminen on luonnollisesti samalla tavalla vapaaehtoista kuin nyt tehtäväänkin tutkimukseen. Yhteystietojen antaminen ei velvoita osallistumaan jatkotutkimukseen, mikäli et siihen aikanaan ole halukas.

Mikäli haluat antaa yhteystietosi jatkotutkimusta varten, kerro

Hei! Olen xxx XXX:stä, hyvää päivää/iltaa. Teemme Valtion nuorisoasian neuvottelukunnan toimeksiannosta tutkimusta, joka koskee hyvinvoinnin eri osatekijöiden välittymistä vanhemmilta heidän lapsilleen. Olisiko sinulle hetki aikaa vastata? (HAASTATTELIJALLE TIEDOKSI: HAASTATTELU KESTÄÄ NOIN 10 MINUUTTIA, SOVI UUDELLEENSOITTO TARVITTAESSA)

Olemme haastatelleet tätä samaa tutkimusta varten jo teidän lastanne (NIMI??). Sinun yhteystietosi saimme lapseltanne samalla kun kysyimme häneltä lupaa haastatella myös hänen vanhempiaan tai huoltajiaan.

Mikäli voimme haastatella sinua, saammeko luvan yhdistää kyselyn tiedot lapseltasi ja/tai tämän toiselta vanhemmaltaan tai huoltajaltaan haastattelussa saatuihin tietoihin? Vastauksiasi ei siis kerrota lapsellesi, vaan kerättyä aineistoa käsitellään luottamuksellisesti ja analysoidaan tilastollisesti. Tutkimuksen tulokset julkaistaan tavalla, jossa yksittäisiä tutkittavia ei voi tunnistaa.
