To the reader

This codebook is part of the data FSD2973 archived at the FSD (Finnish Social Science Data Archive). The dataset has been described in as much detail as possible in Finnish and English. Variable frequencies, variable and value labels, and missing values have been checked. If necessary, the data have been anonymised. The data and its creators shall be cited in all publications and presentations for which the data have been used. The bibliographic citation may be in the form suggested by the archive or in the form required by the publication. The bibliographic citation suggested by the archive:

The user shall notify the archive of all publications where she or he has used the data. The original data creators and the archive bear no responsibility for any results or interpretations arising from the reuse of the data.

The codebook contains information on data content, structure and data collection, and includes a list of publications wholly or in part based on the data, according to publication information received by the FSD. The second part of the codebook contains information on variables: question texts, response options, and frequencies. The third part contains indexes.

Variable distributions presented in this codebook have been generated from the SPSS files. Distribution tables present variable values, frequencies (n), frequency percentages (%), and valid percentages (v. %) which take into account missing data. All distributions are unweighted. If the data contain weight variables, these will be found at the end of the variables list. In some cases frequency distributions have been substituted by descriptive statistics. Categorised responses to open-ended questions are not always included in the codebook. Distributions may contain missing data. The note "System missing (SYSMIS)" refers to missing observations (e.g. a respondent has not answered all questions) whereas "Missing (User missing)" refers to data the user has defined as missing. For example, the user may decide to code answer alternatives 'don't want to say' or 'can't say' as missing data.

The codebook may contain attached files, the most common one being the questionnaire.

Finnish Youth Surveys

Advisory Council for Youth Affairs (Nuora), nowadays called the State Youth Council, started to produce Youth Surveys in 1994. This survey series charts attitudes and expectations of Finnish young people aged 15 - 29. Each survey contains both current questions and recurring questions which are repeated over time, enabling the study of long-term attitude changes. The main themes include attitudes to education, working life, social security, spending, drug use, and young people's willingness to participate in order to influence decision-making.

Abstract

The theme of the Finnish Youth Survey 2014 was equality. The survey is divided into the following topics: discrimination, social exclusion, future, social life, social trust, immigration and racism, social security, and satisfaction.

Relating to discrimination, the respondents were asked which things they considered discrimination (e.g. not receiving service in a restaurant because of ethnic background), whether they had witnessed discrimination against young people and where, and in what ways young people had been discriminated against. Personal experiences of and opinions on discrimination were charted by asking the respondents, for instance, whether they themselves had faced discrimination and where, when they had faced discrimination, what effects the discrimination had had, whether they had received help, how effective measures against discrimination were, and whether affirmative action was a good way to combat discrimination. Further questions examined whether the respondents had intervened if they had witnessed discrimination, and whether they had discriminated against others.

The questions about social exclusion investigated opinions on the reasons for exclusion/marginalisation (e.g. lack of education, own volition), and things that caused uncertainty or insecurity to the respondents (e.g. safety and health of family, personal loneliness). Concerning future, views were surveyed on own future, the future of Finland and the world as well as on the possibilities to influence own life. Relating to social life, the respondents were asked how often they saw, phoned, and contacted their friends on the Internet, how many close friends they had, whether they had

friends from groups other than their own (e.g. people in sexual minorities), whether they belonged to a close-knit group of friends, and whether they considered themselves as a member of a youth subculture (e.g. goth, punk, skater).

The questions about social trust charted trust in people in general, and trust in people from other groups (e.g. people of different religion or creed). Relating to immigration and racism, the respondents were asked to what extent they agreed with some statements (e.g. "I have friends with immigrant background", "I cannot imagine having an immigrant as a spouse"). Regarding social security, the respondents were presented a number of statements about the sufficiency of social security in Finland. The respondents' satisfaction with their economic situation, leisure time, relationships, health, physical condition, appearance, and life on the whole was surveyed. Other questions investigated voting intention, participation in a civic organisation, health, and symptoms experienced in the previous six months.

Background variables included, among others, the respondent's gender, age, mother tongue, membership in a religious community, household composition, economic activity, country of birth, nationality, identification with various groups, education level, average grade of the latest report card as well as education levels and countries of birth of parents.

1.3 Structure and collection of the data

Country: Finland

Geographic coverage: Finland

Analysis or observation unit type: Individual

Universe: Young people aged 15-29 living in Finland, excluding the Åland Islands

Collection date: 7.4.2014 – 8.6.2014

Data collector(s): TNS Gallup Finland

Mode of data collection: Telephone interview

Type of research instrument: Structured questionnaire

Time period covered: 2014

Time method of the data collection: Longitudinal: Trend/Repeated cross-section

Response rate: 20.1%

Number of variables and cases: The data contain 285 variables and 1903 cases.

Sampling procedure: Mixed probability and non-probability

A random sample of 28,005 persons aged 15-29 living in continental Finland. Phone numbers were combined with other personal data, and the numbers were called until desired quotas were met. The quotas were based on gender, age group, mother tongue and major region.

A total of 1,903 interviews were conducted. The interviewees comprised 1,680 Finnish-speaking persons, 100 Swedish-speaking persons, and 123 persons with some other mother tongue. These numbers are representative of 15-29 year old people living in Finland.

1.4 Use of data

Data appraisal

Variable T3 containing information on the respondents' municipalities of residence was removed from the data, and two background variables, major region and statistical grouping of municipalities (municipality type), were added.

The response rate was calculated as the proportion of conducted interviews out of all interview attempts (i.e. conducted interviews + refusals), that is, $1,903 / (1,903 + 7,570) * 100 = 20.1$. Calculating a response rate for telephone interviews is subject to interpretation.

NUORISOBAROMETRI 2014 / ”YHDENVERTAISUUS”

Hei! Olen (nimi) TNS Gallupista, hyvää huomenta/päivää/iltaa. Teemme Valtion nuorisoasiain neuvottelukunnan toimeksiannosta tutkimusta, joka koskee nuorten näkemyksiä heidän omaan elämäänsä liittyvistä asioista. Kyselyn teemana on yhdenvertaisuus. Kysymysten läpikäynti vie noin 20 minuuttia. Olisiko sinulle hetki aikaa vastata?

Vastaukset käsitellään luottamuksellisesti ja analysoidaan tilastollisesti. Tutkimuksen tulokset julkaistaan tavalla, jossa yksittäisiä tutkittavia ei voi tunnistaa. (HAASTATTELIJALLE TIEDOKSI: HAASTATTELU KESTÄÄ NOIN 20 MINUUTTIA, SOVI UUDELLEENSOITTO TARVITTAESSA)

SYRJINTÄ

Tässä kyselyssä selvitämme syrjintään liittyviä asioita. Syrjintä tarkoittaa sitä, että henkilöä tai ryhmää kohdellaan ilman hyväksyttävää oikeutusta eriarvoisesti esimerkiksi sukupuolen, iän, uskonnon, vamman, seksuaalisen suuntautumisen, etnisen alkuperän tai muun henkilöön liittyvän syyn perusteella vuoksi. Myös esimerkiksi koulukiusaaminen voi siis olla syrjintää.

K1 Mitkä seuraavista asioista ovat mielestäsi syrjintää? (Kyllä / ei / eos) (TAI: valitse kaikki sopivat tms, miten vain kysyminen on helpointa...??)

- 1) Se, etteivät samaa sukupuolta olevat voi mennä avioliittoon
- 2) Sitä, että asevelvollisuus koskee vain miehiä
- 3) Se, että hyvin toimeentulevat elävät pidempään kuin huonosti toimeentulevat
- 4) Se, että henkilö ei saa palvelua ravintolassa etnisen taustansa vuoksi.
- 5) Se, että työhönotossa edellytetään täydellistä suomen kielen taitoa, vaikkei se työn tekemisen kannalta ole välttämätöntä.
- 6) Se, että etninen alkuperä estää työn saamisen, vaikka hakija olisi muuten pätevä haettavaan tehtävään
- 7) Se, että seksuaalivähemmistöön kuuluvaa henkilöä nimitellään
- 8) Se, että pyörätuolia käyttävä henkilö ei portaiden vuoksi pääse sisälle kirjastoon tai kauppaan
- 9) Se, että nuorten työttömyys on korkeampi kuin muiden
- 10) Se, että maahanmuuttajien työttömyys on korkeampi kuin muiden
- 11) Se, että koulun uskonnonopetus on pakollista evankelisluterilaisen kirkon jäsenille
- 12) Se, että koulun yhteisissä juhlissa on uskonnollisia osuuksia

K2 Oletko havainnut nuoriin kohdistuvaa syrjintää viimeisten 12 kuukauden aikana seuraavissa paikoissa tai tilanteissa? (kyllä usein / kyllä joskus / en ollenkaan / eos)

- 1) koulussa
- 2) työelämässä
- 3) kodissa
